

2026 NATIONAL INTEGRATED SPECIAL REPORT –
DIGITAL AND NEWSPAPER

Securing Canada’s Energy Future

INTEGRATED CONTENT FEATURES: Turnkey solutions in which participating advertisers can be mentioned or quoted in at least one story. The PDF overviews are intended to be a thematic starting point. Topics highlighted will be revisited and updated during the production stage to align with the current situation

Energy security is becoming an increasingly important priority as global geopolitical tensions, rising energy demand and the transition to lower-carbon power reshape how countries plan and manage their energy systems. For Canada, ensuring reliable, affordable and resilient energy will require investment across a diverse mix of resources, technologies and infrastructure. This special feature will examine the strategies, innovations and partnerships strengthening Canada’s ability to meet future energy needs while supporting economic growth and long-term sustainability.

Proposed Topic Highlights

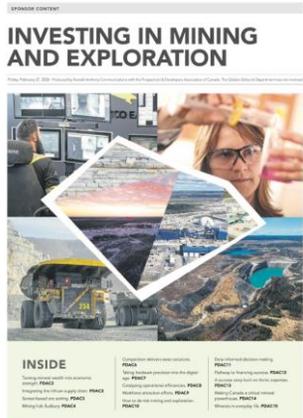

- **Strengthening Canada’s Power Grid:** Investments in transmission infrastructure, grid modernization and interprovincial connections to support reliability and growing electricity demand.
- **Diversifying Canada’s Energy Mix:** How renewables, nuclear, natural gas and emerging technologies are contributing to a balanced and resilient energy system.
- **Energy Storage and Grid Stability:** The expanding role of battery storage and other technologies in stabilizing renewable energy supply and supporting grid reliability.
- **Critical Minerals and Energy Supply Chains**
Why minerals such as lithium, nickel and cobalt are essential to energy technologies and how Canada is positioning itself within global supply chains.
- **Energy Innovation and Next-Generation Technologies:** Advances in hydrogen, small modular reactors, carbon capture and other emerging solutions shaping the future of energy production and distribution.
