

2026 NATIONAL INTEGRATED SPECIAL REPORT –  
DIGITAL AND NEWSPAPER

# Sovereign computing in Canada

*Advancing AI infrastructure, data sovereignty, and next-generation performance*

**INTEGRATED CONTENT FEATURES:** Turnkey solutions in which participating advertisers can be mentioned or quoted in at least one story. The PDF overviews are intended to be a thematic starting point. Topics highlighted will be revisited and updated during the production stage to align with the current situation

As investment in artificial intelligence and advanced computing accelerates globally, Canada is positioning itself as a key player in building secure, high-performance digital infrastructure. With growing emphasis on data sovereignty, energy efficiency, and domestic innovation, Canadian-led solutions are becoming increasingly important to how data centres are designed and operated. This special feature will explore how computing advancements, including AI infrastructure and cooling technologies, are supporting Canada's evolving digital economy. This report is strategically timed ahead of OCP Canada Tech Day in June and ALL IN AI Conference Montreal in September.

**AI infrastructure growth:** Examining how rising demand for compute power is driving investment in Canadian data centres and high-performance systems.

**Data sovereignty priorities:** Exploring the importance of keeping data storage, processing, and governance within Canadian borders.

**Next-generation cooling:** Highlighting innovations such as immersion cooling and advanced thermal management to improve efficiency and performance.

**Energy and sustainability:** Addressing how data centres are balancing increased compute demand with energy use, emissions, and environmental targets.

**Canadian innovation leadership:** Showcasing domestic companies and technologies contributing to global computing advancements.

**Resilient digital ecosystems:** Understanding how partnerships, policy, and infrastructure are strengthening Canada's position in the global tech landscape.

**From global to local:** Exploring how international technologies and campaigns are being adapted to reflect Canadian market priorities and regulatory environments.
